

# Fun with AI Image Manipulation

June 17, 2026. Fred Gielow.

It is amazing what I'm able to do with AI tools I found on the Internet.

I took this picture this morning.

I made my hair longer.

I became a cartoon character.

I made a line drawing.

I removed facial lines and blemishes.

I made another cartoon character.

I made a claymation character.

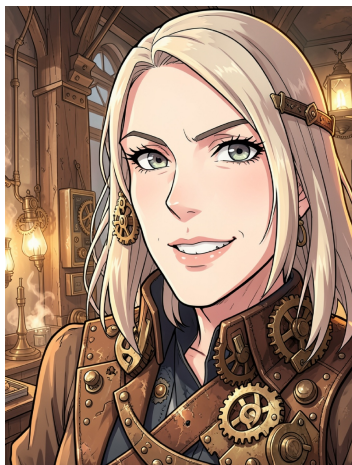

I made a cubism painting.

I look like I'm in South Park.

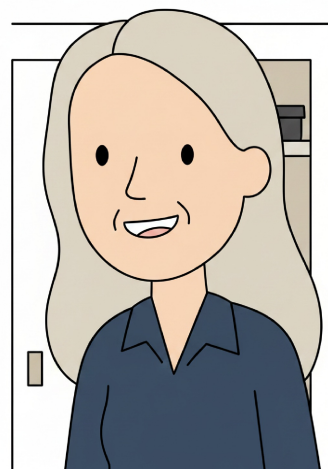

I made a steampunk character.

I made a Pixar character.

I made a very simplistic image.

I made a 3-D character.

I made this rendering.

And, I made this caricature.

Most of these transformations were done with <https://imagetocartoon.com/>

It's simply amazing what AI can do!
